Almost the only inform item we have us to the result of the election is confined to the partial returns of Multnomah county. Here there is practically a revolution, in that the county hitherto strongly republican, now gives a strong damocratic majority on governor and elects a portion of the donocratic local traket. A RAILROAD SCHEME.

The people of the Walla Walla country are unxious for direct connection with the Northern Pacific railroad, and are trying to secure a line to Walinia parallel or practically so with that of the Oregon Ballway a Navigation company A great deal of "wind work" is now being done and steps have been taken toward organizing a and steps have been taken toward organizing in Company, and with a view of securing capita to put the project through. Of detuils of rinter mileage, clost of construction, sit, we have up information. Indeed we cannot say if the scheme has yet developed definite plans. The incentive to this project was the advan-

age enjoyed last year by grain districts whi h lay in the Northern Pacific field. It will be re-membered that thus company havied wheat from Wallula to St. Paul for an advance of only \$2 per ton over the charges via the Oregon Ball way & Navigation line to Portland A ton of wheat is worth a great deal more at at Pulliban at Portland, so the Eastern rate proved a great benefit to those who could take advantage of it. Farmers living near that road in Eastern Washington were able to get from 5 to 15 cents per bushel more than those who lived a licent to the O. R. & Y. This is the basis of the new scheme, and its whole hope of profit. It is not reflected that a change of rate on the Northern Pacific would make the proposed road practical by worthless. And it is forgotten that a change of rate is the change of all changes most likely to cones. It is a well known fact among all who have any intelligence of railroad matters that grain in any quantity can both the based 2000, when the Section is the not be hauled 2000 miles for % per ton, the Northern Pacific rate ast year. If a runi oad, company has a few care which, unless loaded at a cheap rate, must go across the continent empty, it can of course fill these up and carry the contents for little or nothing But such business must be limited to the tonnage of the empty hars. In the case of the Northern Pacific the eastward cheap shipments must be small, comparatively, since the company will not long
